SUMMARY

Software engineer with passion to work and excel in the field of web development, software development and new technologies. Looking for an opportunity to join an organization where I can contribute to its growth, while also developing myself professionally and personally.

EDUCATION

B.Tech in Information Technology | Sathyabama Institute Of Science and Technology | 9/2020 – 5/2024

- CGPA : 8.75/10

SKILLS

C++, Data Structures, SQL, HTML, CSS, Javascript, ReactJs, NodeJs, ExpressJs, MongoDB, GIT, Github

EXPERIENCE

Full Stack Web Developer | CareerPhi - By ServiPhi Technologies |

September 2024 - December 2024 | Pune, India

- Developed and launched performance-optimized solutions, accelerating data processing times by 35%, improving both system responsiveness and user satisfaction.
- Collaborated across departments to diagnose and address key issues, decreasing project cycle times by 25%.
- Refined front-end and back-end development processes, enhancing development speed and consistency.

Cloud Computing Technology-Internship | Centre for Development of Advanced Computing : C-DAC |

January 2023 - May 2023 | Chennai, India

- Designed and implemented solutions that enhanced data processing speeds by 25%, driving system performance improvements.
- Partnered with diverse teams to identify and resolve complex issues, achieving a 15% reduction in project delivery times.
- Researched and integrated advanced cloud technologies, optimizing resource allocation and operational efficiency.

PROJECTS

Online Examination Website

- Developed a comprehensive online examination platform using HTML, CSS, JavaScript, and PHP, managing a database with over 1,000+ user records.
- Integrated features such as timed assessments, progress tracking, and real-time rankings, ensuring a seamless experience for students and administrators.

Network Configuration in Virtual Environments with VirtualBox and Ubuntu

- Deployed and configured 2 virtual machines using VirtualBox and Ubuntu, ensuring 100% seamless network connectivity.
- Conducted 50+ successful reachability tests using the Ping command, validating the accuracy of the network configuration.

Loan Origination System

- Developed a professional Loan Origination System (LOS) using the MERN stack (MongoDB, Express, React.js, Node.js) to streamline the loan application process, reducing application processing time by 25%.
- Implemented key functionalities such as loan application submission, status tracking, and an admin review dashboard, improving user experience by 30% and operational efficiency by 20%.
